Scotia, New York 12302

Information and Request Form For Non-Public School Transportation

Transportation of children to non-public schools is governed by New York State Education Law. The school district is required to provide transportation for resident pupils in grades K-8 living more than two miles from the school they attend and for resident pupils in grades 9-12 living more than three miles from the school they attend, but in neither case is transportation required where the pupil's residence is more than 15 miles from the school attended. However, a student living more than 15 miles from the school he/she attends may be eligible for transportation from a designated pickup point in the district if other students in the district living within 15 miles of that school are being transported there.

The Scotia-Glenville Central School District provides transportation to several non-public schools in the area, both elementary and secondary. In order for this service to be provided for a student for the next school year, a request must be submitted <u>not later than April 1</u> for each child requiring non-public school transportation. Such request is required by Law and may be made using the form below.

Completed forms should be submitted by <u>April 1</u> to the office of the non-public school the child will attend next year, or to the Transportation Supervisor, Scotia-Glenville Central School District, Transportation Office, 1 Tartan Way, Scotia, New York 12302. If additional information is desired regarding transportation to non-public schools, contact the Transportation Supervisor at 382-1291.
